

* Renata: Summary RESOLUTION

Puppet for Distrib. OP and EPICS core
scwit: EPICS config files etc...

* Wrap up By Greg

* Lowest Level: CA and PV Access

EZ: HW software will described later

* CA connects lowest to higher level

→ caQTM decision including Martin Gasler

Decisions Needed!

* proposal about image archiving

↳ different archiver? directly to HDFS?

↳ NTImage (from EPICS4 group)
Normative Types

Windows Port of PVA needed

* Images from Photonics might need some more thought but as well as input from Scientists

Quest

* Do we need all Diagnostic Data in E4 to have pulse ID attached?

* Timing at LCLS is not analyze friendly

↳ might need some E4 services to make usage of BSDA easier

* ~~BD~~ and Controls have to decide which parts of the Online Modelling is done by whom

↳ service "on demand"

* Database has to be a production system

↳ Resources needed (RK)

↳ extracting to XML

LCLS
had a consulting firm

RESOLUTION

An Oracle System is needed for Operation and should be reliable

↳ issue for management to find the resources

* We have to decide how important is for different application/services

↳ after design of all services

- alarms and handling of failures have to

↳ proposed solution
